Reprocessing Ultrasound Probes

AUTOMATION

Always don appropriate PPE

- Reference potential hazards
Reference IFU (Instructions For Use) for cleaning/HLD
- Complete point-of-care cleaning at patient beside before transport to reprocessing area per manufacturer's IFU

- 1 Transport to reprocessing suite in a properly labeled biohazard device
- 2 Remove procedure cover
- 3 Insert soiled ultrasound probe in Ethos® — follow on-screen prompts
- 4 Remove ultrasound probe and dry with approved drying method to prevent recontamination of ultrasound probe
- 5 Store in HEPA-filtered cabinet or transport ultrasound probe to next procedure
